Brainy Baby

DVDs

The first few years of life are critical periods for brain development and these DVDs stimulate learning in babies and toddlers. The Right and Left Brain videos work together to engage a child's whole brain (logic and creative) to help boost a baby's intellect. 6 - 36 months

The Miracle Blanket

The Miracle Blanket® triggers an almost immediate peaceful serenity in a restless, crying baby. With its unique, patented design, which combines the subtle benefits of swaddling with additional distinctive features, it recreates the comforting sensations experienced in the womb. In a Pre-Oscar interview with Jay Leno, Heath Ledger praised The Miracle Blanket®, saying it was truly what has helped baby daughter Matilda Rose sleep so both he and his wife Michelle get their much needed rest too. Newborn to 14 weeks.

The Mozart Effect for Newborns/Babies (The Children's Group) CDs

Mozart Effect author/producer Don Campbell was profoundly influenced by the pioneering work of Dr. Alfred Tomatis, a French researcher who studied the effects of listening and music -- especially Mozart's music -- on the overall mental and physical health of children and adults. Studies show that classical music has a powerful effect on the intellectual and creative development of newborns to: regulate natural body rhythms * reduce the stress of new life * enhance auditory and emotional awareness * stimulate rhythmic movement * and induce relaxation and sleep. Campbell says that hearing and making music "is an enriching and positive part of the human experience and it can change children's lives." The Mozart Effect for Newborns, The Mozart Effect for Babies, Volumes 1-3 and for older siblings, The Mozart Effect for Children, Volumes 1-3
